

**CALIFORNIA BAY-DELTA  
MEMORANDUM OF UNDERSTANDING  
AMONG FEDERAL AGENCIES**

**I. RECITALS**

(a) The Sacramento/San Joaquin River Delta-San Francisco Bay estuary (Bay-Delta) is among the most important estuary ecosystems in the nation. The Bay-Delta is a source of drinking water for more than 22 million people; it supports a \$28 billion agricultural industry; and, until recently, it has supported a thriving commercial and recreational fishing industry that has contributed hundreds of millions of dollars to the California economy.

(b) The Bay-Delta is in crisis. Decades of environmental degradation have led to severe declines in Delta fisheries. California is in the third year of drought. Both the Bay-Delta ecosystem and the economy dependent on its water and fish are on the precipice of collapse. Furthermore, climate change and seismic risks present additional, serious threats to the Bay-Delta environment and the water supplies that travel through it.

(c) Given the national significance of the Bay-Delta ecosystem and its importance to the millions of people who depend on it for water supplies and for environmental benefits, it is imperative that the federal government reestablish its leadership role in Bay-Delta matters, working in partnership with the State of California and interested stakeholders.

**II. PURPOSE**

(a) The purpose of this Memorandum of Understanding (MOU) is to confirm the federal commitment to work in partnership with the State of California and interested stakeholders to protect a reliable and sustainable long-term water supply for California while also restoring the environmental integrity and sustainability of the Bay-Delta ecosystem.

(b) This MOU establishes a structure for coordinating and streamlining the actions of the federal agencies with primary responsibilities and authority over key aspects of the Bay-Delta to facilitate coordination and cooperation among these agencies in advancing the federal commitment to the Bay-Delta
